

Vejledning til stjernen

1

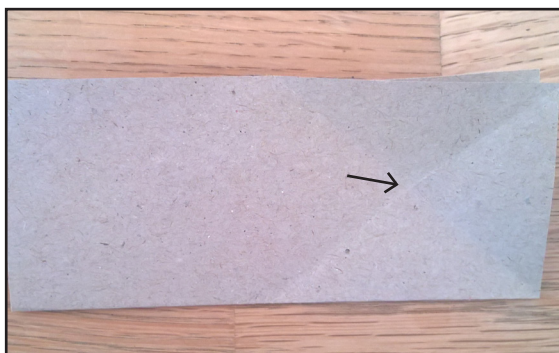

I skal bruge et kvadratisk stykke papir. Fold det på midten.

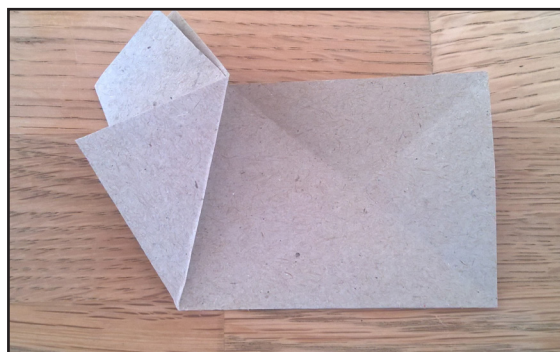

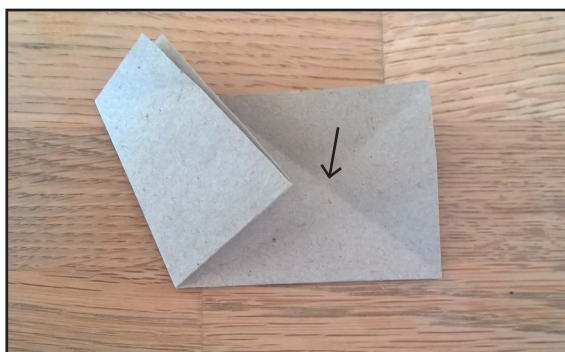

2

Fold hjørnene fra nederste og øverste side. Sådan så der er et kryds på højre del af papiret.

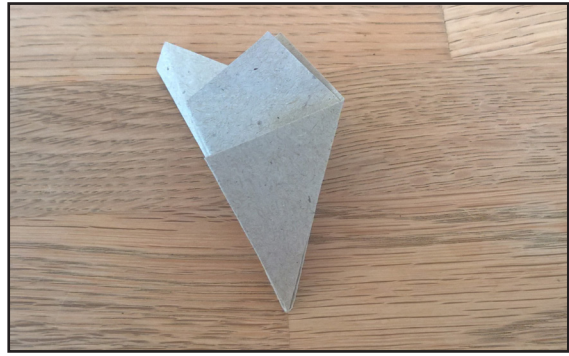

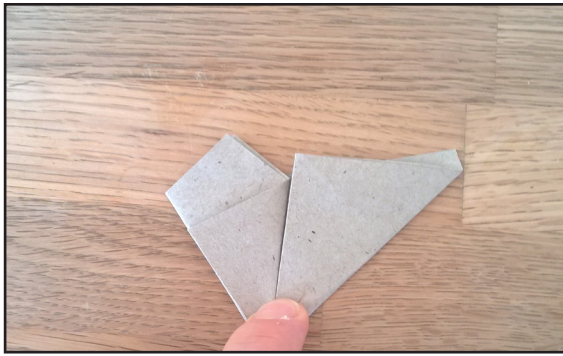

3

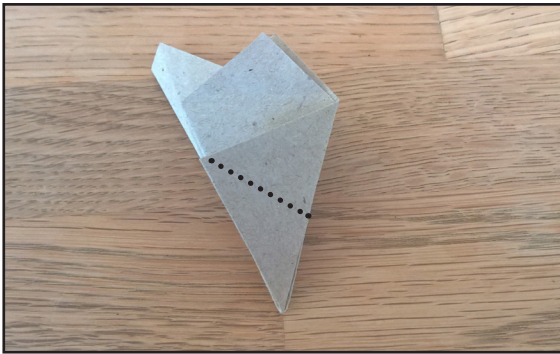

Fold venste nederste spids til krydset. Fold derefter spidsen tilbage, så den ligger langs kanten.

4

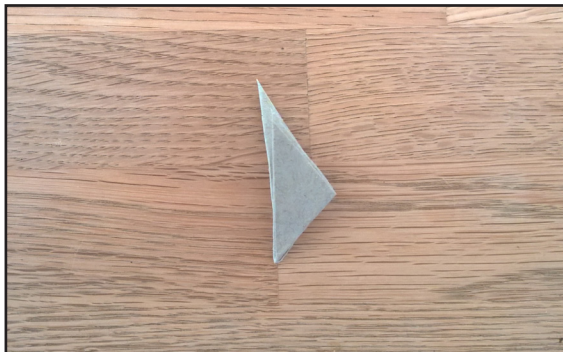

Fold derefter højre spids op og fold den bagom.

5

Klip derefter - se den stribede linje. I kan justere tykkelsen af stjernens spidser, alt efter hvor meget, der klippes af.

6

Fold derefter papiret ud. Og buk stjernens spidser (se pilene).
